Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-4 and 9-23, drawn to method of recording and reading data with a holographic write/read apparatus, classified in class 369, subclass 103.
- II. Claims 5-8, drawn to a holographic recording medium classified in class 359, subclass 3.
- 2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

In the instant case, invention Group I, claims 1-4 and 9-18, claim recording and reading holographic data with different write and read wavelengths. Claims 19-23 claim recording and reading holographic data in a random sequence of the recording locations. On the other hand, claims 5-8 claim a holographic recording layer's thickness is 0.52 times the wavelength of the reading and/or recording light. In other words, the method of recording and reading holographic data as claimed in claims 1-4 and 9-23 do not

require a holographic recording layer with a specific thickness based a read/write wavelength as required by Group II.

- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. A telephone call was made to Mr. Tom Wettermann on September 29, 2004, to request an oral election to the above restriction requirement, but did not result in an election being made.
- 5. Applicant is advised that a reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any response to this action should be mailed to:
Commissioner of Patents and Trademarks Washington, D.C.
